

Week-6 (04/12~04/16)

Tuesday

	Changhai Ren	Duc Trung	Jiaqi Ao	Jiawei Ren	Yangfan Xu
What did I do	<ul style="list-style-type: none"> Add modal components on academic pages. Complete the Redesign the academic model if necessary. Read the conventional commit from the slack. 	<ul style="list-style-type: none"> Allow users to edit Resume information Allow users to delete Resume information 	<ul style="list-style-type: none"> Complete test plan (test structure) setting up the data model change the requirement from signup information page to public information 	<ul style="list-style-type: none"> Finish Aboutme page frontend Change the data model to cooperate with ManagePage. Change UI design and move the edit function to ManagePage Finish database connection (read links and description in the database) for Aboutme page. 	<ul style="list-style-type: none"> Create new eventPage server part ("route", "control", "model", "modal") Create new eventPage UI design ("header", "events", "buttons") Create new eventPage functions ("Add", "Update", "Delete") Communicate with trung about the new page style consistency
What will I do	<ul style="list-style-type: none"> Add backend route path in main file and academics page router Add backend process functional 	<ul style="list-style-type: none"> Start functional test for Resume page Fix bugs for Resume page 	<ul style="list-style-type: none"> Start public information change the data structure connect with the group meeting 	<ul style="list-style-type: none"> Start Funfact Page development. Read trung's and yangfan's code to prepare development for Funfact page. 	<ul style="list-style-type: none"> Implement "Add" button function Implement "Update" button function Implement "Delete" button function
Are there any impediments					

Friday

	Changhai Ren	Duc Trung	Jiaqi Ao	Jiawei Ren	Yangfan Xu
What did I do	<ul style="list-style-type: none"> Add backend route path in main file and academics page router Add "add", "update", "delete" backend functional Add "add", "update", "delete" frontend functional Fix some bugs for the academic page 	<ul style="list-style-type: none"> Start functional test for Resume page Fix bugs for the Resume page 	<ul style="list-style-type: none"> complete the public information page complete the connection with other team partner. fix original bugs 	<ul style="list-style-type: none"> Finish Funfact page frontend Finish add/update functions for Funfact Page Finish database connection for Funfact Page(read and write funfacts in database) with backend 	<ul style="list-style-type: none"> Implement "Add" button function Implement "Update" button function Implement "Delete" button function
What will I do	<ul style="list-style-type: none"> Implementing the "add", "delete" function in backend and frontend. Redesign academic page user interface Test academic page at the end 	<ul style="list-style-type: none"> Prepare for Sprint 2 	<ul style="list-style-type: none"> complete the model of test plan 	<ul style="list-style-type: none"> Finish delete function for Funfact Page. Test frontend style for Funfact Page 	<ul style="list-style-type: none"> Add .css to eventPage to make it beauty
Are there any impediments			<ul style="list-style-type: none"> There is too much academic pressure 	<ul style="list-style-type: none"> Much more bugs appeared because of typescript during development. 	<ul style="list-style-type: none"> Heavy workload
